

Challenge 2: Odd or Even?

- **The Goal:** Ask the user for a whole number. Print a message telling them if the number is odd or even.
- **What you will learn:** How to use `if-else` logic and the remainder tool.
-  **Code Hint:** Use the **modulo operator** (`%`). It divides two numbers and gives you the leftover remainder. If `number % 2 == 0`, the number is even!
